### ABOUT ME

I am currently studying test automation on my own: PlayWright, Selenium. Lead a healthy lifestyle. I independently upgrade and develop a smart home system based on Home Assistant - an Open Source solution using the Python programming language.  
<https://github.com/AntonB80/HomeAssistant>

At the moment I am at a stage in my life when I want to do what I like.

## EDUCATION

**Specialized IT Training Center  
Innopolis University.**

August 2022 – December 2022

Software tester. Advanced Course. (270 h.)

**Practice within the course:**

- Test Design Techniques.
- Software Development Models / Software Life Cycle / Testing Life Cycle.
- Functional testing of WEB-applications (API). During the QA course, the engineer practiced on the site:  
<https://editor.swagger.io/>
- API integration testing.
- Client-server architecture.
- Functional testing of the mobile application.
- Working with databases PostgreSQL.
- Working with programs: VSCode, Postman, IntelliJ, Selenium, DBeaver, PlayWright.

**Courses from youtube:**

September 2022 – Until now.

- Playwright Beginner Tutorial. Channel - Automation Step by Step.
- Tester from scratch. Channel – Alex Marshal.
- Selenium WebDriver Course - Alex Marshal.

**Baltic State Fishing Fleet Academy, Kaliningrad Region, Kaliningrad.**  
1999 - 2003

Diploma specialty – marketing.

Diploma qualification – marketer.

## WORK EXPERIENCE

Testing Yandex browser, Yandex with Alice on iOS. Testing Yandex browser macOS. Testing of the 101 Hotels hotel booking site. API testing on the site: <https://editor.swagger.io/>, namely, to implement postman - a collection that checks the life cycle of an object using the CRUD system, and writing autotests with different tasks. Practical use of test design in work. Working with the database writing SQL queries using subqueries.

All artifacts can be found at the following link

## SKILLS

**Test theory**

- Software Development Models / Software Life Cycle.
- Types of software testing: functional, non-functional, change testing (smoke, sanity, regression testing).
- Test Methods.
- Test Design Techniques.
- Bug life cycle.
- Test documentation (checklists, test cases, test suite, bug report).

**WEB-testing**

- HTML.
- CSS.
- DevTools.
- Postman using autotests.

**Mobile testing**

- Android Studio.
- ADB.
- Fiddler.

**Working with the database / SQL**

[https://github.com/AntonB80/Study\\_2022/tree/1945173a7f8262e615e0b68cd75ac9004e4c0f4e/SQL](https://github.com/AntonB80/Study_2022/tree/1945173a7f8262e615e0b68cd75ac9004e4c0f4e/SQL)

- Creating and joining tables.
- Changing a table.
- Sorting, filtering, subqueries.
